

FastTrack Schedule 10.2

The best way to plan and manage your projects

FastTrack Schedule 10.2 is the leading, easy to use project management software that helps you plan, manage, and report projects. Powerful new tracking tools and dynamic status reports keep team members in sync, costs under control, and projects on schedule—faster and easier than ever before.

Top new features in FastTrack Schedule 10.2

New Intuitive Interface

Redesigned, intuitive new Mac and Windows interfaces to speed your project planning and tracking.

New Base Calendars

Choose from standard, 24 hour, and night shift or customize your own.

New Effort-Driven Scheduling

Automatically adjust task durations as resources are added or subtracted.

New Image Columns

Add pictures of task items, resources, designs, progress photos, and more.

New Assignment Contouring

Easily re-distribute resources' efforts to optimize workloads.

New Work Usage Inspector

Make precise assignments with detailed snapshots of resource free and busy time.

New Getting Started Screen

Instant access to templates, video tutorials, and more.

Get on schedule quickly

FastTrack Schedule 10.2 provides an instant framework for all your project details. Choose from over 50 industry-specific QuickStart Templates or simply create schedules from data in Excel®, organizers, databases, and other project management programs. In minutes, project plans come to life in eye-catching schedules.

Great for both new and experienced project managers, FastTrack Schedule 10.2 simplifies project planning and helps you achieve your project goals.

Easily enter tasks, deadlines, and assignments. And when priorities shift, it's easy to revise plans, avoid potential bottlenecks, and stay on track.

Create custom project snapshots to pinpoint specific tasks and resources or get a birds-eye view of overall project status. Then add a logo, legend, or picture for presentation-quality schedules that are sure to make an impact with stakeholders and clients.

Maximize your resources

Assign and manage people and equipment with pinpoint accuracy. Resource graphs clearly identify under or over allocation, making it easy to optimize workloads.

Powerful project tracking

Track progress, costs, profit, and all key project details in customizable reports. Easily set task dependencies and rely on critical path scheduling to meet key deadlines.

Impressive reporting

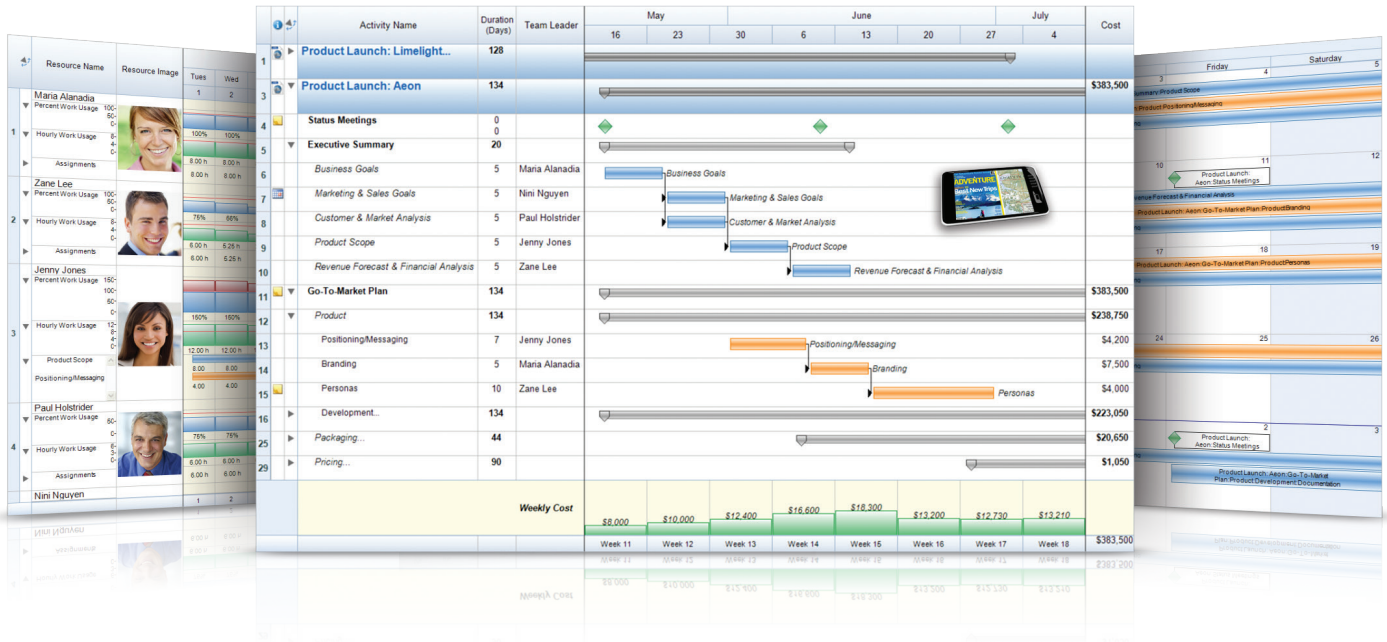

Present project details in great-looking Gantt charts, monthly calendars, resource graphs, and to-do lists that keep teams and clients informed of project status.

Works well with others

Exchange data with Microsoft Project®, export tasks to your favorite calendar programs including Calendar (Mac OS and Windows), Google Calendar, and Outlook®, and integrate FastTrack Schedule into your business process to improve strategic planning and boost productivity.

Share your schedules

Collaborate with both Mac and Windows team members and seamlessly consolidate schedules into a master file. Easily add project snapshots to presentations, proposals, and Web sites.
